

MAJOR FUNCTION

This is skilled work supervising one or more crews in the performance of maintenance activities for the City's utilities, public infrastructure or streets and drainage networks. Incumbents must be knowledgeable of these networks and related assets, as they are often the first contact for customers and other citizens who are impacted by their work; they personally perform some of the more difficult maintenance tasks and they operate heavy equipment on job sites. Position incumbents are responsible for providing on-the-job-training and orientation to staff supervised. Moderate decision-making responsibilities require the incumbent to exercise some discretion and independent judgment. Work is performed under the general supervision of a Maintenance Chief and is reviewed through observations, inspections and by results obtained.

ESSENTIAL AND OTHER IMPORTANT JOB DUTIES**Essential Duties**

Following consultation with Maintenance Chief to ascertain current workload requirements and any special directions, plans, schedules and coordinates work activities for maintenance crews to meet production standards and maximize use of resources such as equipment, materials and supplies. References drawings, blueprints, GIS data, specifications and work orders, as necessary to establish clear work objectives. Obtains necessary materials and supplies for current jobs and places special orders for "hard-to-get" or back-ordered materials and supplies. Enforces safety precautions for the protection of assigned crew, the environment and the public. Performs or takes the lead in performing the more difficult maintenance tasks, such as pouring and finishing concrete, stripping roadways, stormwater infrastructure systems and inspections of gas, water distribution and wastewater collection systems. Operates and maintains heavy equipment, such as excavators, backhoes, front-end loaders, 2-ton crew trucks and 12-yd. tandem dump trucks. Responds to and investigates citizen concerns related to applicable utility maintenance activities. Makes referrals to other areas, as is applicable. Ensures that applicable notice is given to public for planned maintenance work that impacts them. Inputs data into Data Tracking Systems and completes other administrative tasks, such as recordkeeping, and basic reports relative to material use, equipment maintenance, etc. Provides on-the-job training to new employees and supports Career Progression efforts, as applicable. Assists with classroom training designed to teach the proper techniques and procedures to meet the department's minimum standards, requirements of oversight and regulatory bodies. Keeps accurate time and work records. Completes performance evaluations for assigned crew. Serves on selection panels and makes recommendations for hire. Performs related work as required.

Other Important Duties

Recommends development and training opportunities for supervised staff and coordinates staff's attendance to insure uninterrupted work flow. May serve on Career Progression evaluation panels and/or other cross-functional ad hoc committees. Performs special assignments, as needed. Works on call, after hours and emergencies, performing as assigned. Performs related work as required.

DESIRABLE QUALIFICATIONS**Knowledge, Abilities and Skills**

Considerable knowledge of the principles and practices of utility, public infrastructure and drainage operating rules and the associated construction and maintenance regulatory requirements. Considerable knowledge of the operations of trucks, trenchers, backhoes, TV and other equipment used in this work. Ability to instruct others in the use of tools and equipment and the occupational hazards of the work. Ability to take charge in emergency situations and maintain control until relieved by management. Ability to establish and maintain effective working relationships, as necessitated by the work. Ability to understand and transmit oral and written instructions and to read working

diagrams, GIS data, sketches and simple blueprints. Ability to prepare simple reports and keep accurate records. Ability to assist with the design and delivery of subject specific training. Physical strength and agility sufficient to work out of doors under adverse weather conditions. Skill in the operation of computers and the related programs and applications necessary for successful job performance.

Minimum Training and Experience

Possession of a high school diploma or an equivalent recognized certificate and four years of skilled level experience in utility, public infrastructure, or drainage construction or maintenance activities, including six months of experience serving as a lead worker on a crew or as crew leader.

Necessary Special Requirements
